Hisense

GoBoard

86WE3FE

86" ADVANCED INTERACTIVE DISPLAY

Hisense Interactive Display solutions deliver exceptional performance and market leading value. Combining the power of a digital display, tablet, electronic whiteboard and educational tools, Hisense delivers the ultimate all-in-one display solution. Smart OS and ecological abundance, provides best-in-class user experiences while seamless wireless integration makes collaboration both simple and engaging. The NEW GoBoard features the Google Play Store, Android 14.0 operating system and an optimized smart whiteboard to empower your educational activities.

Highlights

Android 14.0 & EDLA certified

Powered by Android 14.0, WE3FE series has greatly enhanced user experience through improvement of hardware compatibility and enrichment and optimization of application ecology. Google Certified can help users to use GMS packages to ensures compatibility and optimal performance with Google applications and services.

Dedicated visual quality for education

High brightness of up to 400 nits and 4K Ultra HD picture quality ensure perfect colour and rich detail. An anti-glare glass panel reduces glare, reflections and fingerprints while maintaining contrast and brightness. And thanks to the 178° viewing angle, every student can perfectly see what appears on the screen.

Smart whiteboard

WE3FE offers an intelligent whiteboard. This whiteboard adopts high-precision infrared touch control, provides a variety of tools including formula editor, mind map, shapes, etc., supports four-split screen display, and handwriting can be easily converted to standard font. By integrating the above functions into the whiteboard, teaching and learning will be simplified.

Caring for the eyes

Certified by TÜV Rheinland, the WE3FE series effectively reduces harmful blue light and ensures a more comfortable viewing experience, reducing the risk of eye fatigue and headaches with prolonged use.

Pluggable WiFi Module

With a pluggable WiFi module, information security is protected from leakage, and you can make a quick replacement of the WiFi module on failure. Other than that, the pluggable module is more stable than the fixed ones due to its independent circuit design and heat dissipation structure.

A better writing experience

With up to 40 touch points, the WE3FE allows multiple users to annotate simultaneously, increasing engagement and encouraging group collaboration. The panel features an impressively low writing height, provides a smooth and natural writing experience that feels like writing on paper, effectively reducing latency and allowing for a smoother operating experience.

Quick & easy screen sharing

WE3FE supports webcast, airplay, Miracast, Chromecast, etc. Dual WiFi modules simultaneously support a screen sharing hotspot and a WiFi network connection. With low image latency, you'll enjoy a faster, more stable connection and a superior screen sharing experience.

Energy Star Certified

The WE3FE is Energy Star 8.0 certified and significantly reduces power consumption and the impact on the environment compared to similar products on the market.

Specifications

| Interactive Display Panel | |
|--|---|
