

CASE STUDY

SARASAT SCHOOL

Project Description

Sarasat School in Thailand has enhanced its teaching and learning environment with the installation of a Hisense GoBoard Interactive display. Designed specifically for education, the GoBoard provides teachers with powerful tools to deliver engaging lessons, while giving students an interactive platform that encourages participation and collaboration. With intuitive touch controls, wireless connectivity, and easy access to educational content, the GoBoard transforms the classroom into a more dynamic and connected learning space. Teachers can seamlessly present, annotate, and share resources, helping to create a richer and more effective learning experience.
