

CASE STUDY

AIRPORT LJUBLJANA

Project Description

Hisense video wall displays have been installed at Ljubljana Jože Pučnik Airport, Slovenia’s main international gateway, in a 2x4 configuration of eight screens to deliver advertising and real-time flight information. With an ultra-narrow bezel, wide viewing angles, anti-glare technology, and built-in remote content management, the VW25E series provides a seamless, captivating display solution that enhances communication across the airport.
