

CASE STUDY

AIRPORT NIKOLA TESLA

Project Description

Hisense video wall displays have been installed at the baggage claim area of Belgrade Nikola Tesla Airport, Serbia’s busiest international airport, in a 4x4 configuration of 16 screens to deliver advertising and real-time flight information to arriving passengers. With an ultra-narrow bezel, wide viewing angles, anti-glare technology, and built-in remote content management, the VW25E series provides a seamless, captivating display solution that enhances communication in high-traffic airport environments.
