

CASE STUDY

BACCHUS MARSH GRAMMAR SCHOOL

Project Description

Bacchus Marsh Grammar in Australia has enhanced its sports and events facilities with the installation of six Hisense 100-inch 24/7 commercial displays in the school gymnasium. These large-format screens provide outstanding visibility for students, staff, and spectators, ensuring content is clear and engaging even in a busy, high-activity environment. The displays are used for a variety of purposes, from live sports coverage and presentations to school events and digital signage, giving the gymnasium a versatile and professional-grade AV solution.
