

# CASE STUDY

## BRITISH INTERNATIONAL SCHOOL

### Project Description

At The British International School in Iraq, Hisense 86" GoBoard interactive displays have been installed to enhance classroom teaching and student engagement. The large-format, touch-enabled screens support dynamic lesson delivery, real-time annotation and seamless content sharing, enabling a more collaborative and interactive learning environment. Designed for daily educational use, the GoBoard solution delivers reliable performance and intuitive operation, supporting modern teaching practices across the school.
