

CASE STUDY

BAZO TECH

Project Description

A 3x2 Hisense video wall installation at Bazo Tech in Uganda delivers a powerful large-format visual solution designed to support presentations, operational monitoring and dynamic digital content. Comprising six ultra-narrow bezel displays configured into a seamless video wall, the system provides sharp image clarity, consistent brightness and reliable performance suited to continuous commercial use. The installation enhances the organisation's ability to communicate information effectively while reinforcing a modern, technology-driven environment.
