

CASE STUDY

SUARNABHUMI AIRPORT

Project Description

At Suvarnabhumi Airport in Thailand, Hisense professional displays have been deployed within critical control room environments to support continuous monitoring and operational management. Designed for 24/7 performance, the commercial-grade panels deliver high brightness, consistent colour accuracy and dependable reliability required for mission-critical applications. The installation provides clear, real-time visualisation of operational data, enabling efficient decision-making while maintaining the high standards expected within a major international aviation hub.

Project details

Project Name	Suvarnabhumi Airport
Project Date	October 2025
Application Scenarios	Corporate
Location	Thailand
Product Installed	86" 24/7 Digital Signage
