

CASE STUDY

KUALA LUMPUR
CONVENTION CENTER

Project Description

The Kuala Lumpur Convention Centre has set a new benchmark for large-scale events and conferences with the installation of 10 Hisense 136" All-in-One LED displays. These high-impact screens provide outstanding visual performance, delivering vivid colours, sharp detail, and seamless clarity for audiences of every size. Designed for simplicity and versatility, the All-in-One LED solutions enhance a wide range of applications, from keynote presentations and exhibitions to corporate meetings and live events. Their sleek design and ease of use ensure a professional finish that matches the prestige of one of Asia's leading convention venues.
