

CASE STUDY
MILTON KEYNES CASINO

Project Description

MK Casino in Milton Keynes has raised the bar for entertainment with the installation of a striking Hisense LED display measuring 6.6m wide. Positioned as a central visual feature, the display delivers vibrant colours, sharp detail, and dynamic content that enhances the gaming and leisure experience for every visitor. The large-format LED wall provides a versatile platform for live event coverage, promotional content, and immersive digital visuals, ensuring the casino environment remains exciting and engaging. Built for reliability and impact, it delivers consistent performance in a demanding, high-energy setting.
